

## ROCKVILLE PROGRESS

Construction is progressing at The Village at Rockville Glenmere project. The project includes a 130 unit apartment building with underground parking, an indoor aquatic center, fitness space and dining venues. Recent activity includes new traffic lanes and mass excavation. Coming soon are concrete foundations and underground utilities. The campus will start welcoming residents to Glenmere in fall of 2020.

## ARCH ON THE ROAD

Frank Muraca recently presented an education session at the LeadingAge Illinois annual conference on the complexities of a high-rise renovation. Brit Vipham hosted a campfire session during the Exposition on the importance of understanding your facilities capital expenditures.

Next up for the ARCH team include attending the LeadingAge Colorado conference in Vail and a presentation at the LeadingAge California conference in Monterey. Our presentation will discuss the importance of capital planning, examining best practices for managing building assets, how to develop facility forecasts and how capital planning relates to organizations' long-range plans.

## GROUNDBREAKING EVENT

ARCH was pleased to participate in the groundbreaking ceremony for The Legacy at North Augusta's new Memory Care Unit. The project will add a three-story addition and include renovations to existing spaces within the building.
